

(A)

(B)

$s[\text{left}] \iff (\text{most small \& right})$

[C]

$K (\leq 200)$  の箱.

箱. ①が過半数.

$K \leq 200$

$N = 2, K = 2$

$$① - K \neq \geq \text{他}$$

i)  $N = 1$

$$N - K + (K-1) C_N$$

$N$

$$n = \sum_{i=1}^n a_i$$

$$n C_{a_1} \times n C_{a_2} \times \dots$$

② 可能判定.

② ...  $m$  個  
他 ...  $m$  個

$$Q \leq \text{他}^{+K} \text{ のとき, 不可}$$

は  $\times 1$

$$① \times m$$

$$\text{他} \times m$$

# ① > 他 の通り数.

①	x	1	...	10	0
2	...	10	0	or 1	
3	...	0	or 1	or 2	
...					

$$\sum \sum_{n=1}^{m \times n} \frac{m}{2} n(n-1)$$

$$\frac{m C_1}{n} + \frac{m C_2}{(n-1)} + \dots$$

$$\{2, 3, 1\}$$

$$\rightarrow \{1, 2, 1\} + \{1, 1, 0\}$$

①                      ①

$$= 200 \text{ (200)} = 200$$

definitely apply

$$\text{one} \geq \text{others} + k$$

证明  $\rightarrow \begin{cases} \text{one} - x \geq \text{others} - y + (k+1) \\ x > y \end{cases}$

$$\text{one} \geq \text{others} + x - y + k + 1 > 0 \quad \because x > y$$

$$\Rightarrow \underline{\text{one} \geq \text{others} + x + k + 1 > y}$$
